TEMPUS

Q2’26 Financial Results

July 30, 2026

Disclaimer

This presentation contains forward-looking statements that reflect Tempus AI, Inc.'s (the "Company" or "Tempus") current expectations and projections with respect to, among other things, its financial condition, results of operations, plans, objectives, future performance and business. Forward-looking statements include all statements that are not historical facts. Such forward-looking statements are subject to various risks and uncertainties, including those set forth under "Risk Factors" in the Company's Annual Report on Form 10-K for the year ended December 31, 2025, and in subsequent reports Tempus files with the Securities and Exchange Commission. Accordingly, there are or will be important factors that could cause actual outcomes or results to differ materially from those indicated in these statements. Tempus does not undertake any obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise. Moreover, the Company operates in very competitive and rapidly changing environments, and new risks may emerge from time to time. It is not possible for the Company to predict all risks, nor can it assess the impact of all factors on its business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements the Company may make.

This presentation includes information concerning economic conditions, the Company's industry, the Company's markets and the Company's competitive position that is based on a variety of sources, including information from independent industry analysts and publications, as well as Tempus' own estimates and research. The Company's estimates are derived from publicly available information released by third-party sources, as well as data from its internal research, and are based on such data and the Company's knowledge of its industry, which the Company believes to be reasonable.

This presentation includes certain financial information, such as Non-GAAP Diagnostics gross margin, Non-GAAP Diagnostics gross profit, Non-GAAP Data and Applications gross margin, Non-GAAP Data and Applications gross profit, Non-GAAP operating expenses, Non-GAAP gross margin, Non-GAAP gross profit, Non-GAAP technology R&D, Non-GAAP R&D, Non-GAAP SG&A, Non-GAAP operating expenses, Non-GAAP loss from operations, Non-GAAP net loss, Non-GAAP net loss per share, EBITDA, and Adjusted EBITDA, that have not been prepared in accordance with generally accepted accounting principles in the United States ("GAAP"). Management uses this Non-GAAP financial information internally in analyzing the Company's financial results and believes that it is useful to investors as an additional tool to evaluate ongoing operating results and trends. Non-GAAP financial measures are not meant to be considered in isolation or as a substitute for comparable financial measures prepared in accordance with GAAP and should be read only in conjunction with the Company's consolidated financial statements prepared in accordance with GAAP. Tempus urges you to review the reconciliation of its non-GAAP financial measures to the most directly comparable GAAP financial measures set forth in the Appendix to this presentation, and not to rely on any single financial measure to evaluate the Company's business. For additional information concerning Tempus' non-GAAP measures, see the Company's most recent earnings release posted on Tempus' Investor Relations website at https://investors.tempus.com.

Tempus believes non-GAAP financial measures are useful to investors and others because they allow for additional information with respect to financial measures used by management in its financial and operational decision-making and they may be used by institutional investors and the analyst community to help them analyze the health of Tempus' business. In particular, Adjusted EBITDA is a key measurement used by Tempus management to make operating decisions, including those related to analyzing operating expenses, evaluating performance, and performing strategic planning and annual budgeting. However, there are a number of limitations related to the use of Non-GAAP financial measures, and these non-GAAP measures should be considered in addition to, not as a substitute for or in isolation from, our financial results prepared in accordance with GAAP. Other companies, including companies in our industry, may calculate these non-GAAP financial measures differently or not at all, which reduces their usefulness as comparative measures.

Tempus has built the *operating system for precision medicine*

Tempus' moat is built on embedded integrations, proprietary multi-modal data, and continuously expanding outcome-linked datasets enhanced through the **connection between its AI platform and broad clinical adoption.**

Diagnostics → feeding Data → feeding Applications

Proprietary ecosystem

Unique data model with exclusive and comprehensive suite of software applications

Unrivaled Connectivity

Provides access to rich multimodal data via bidirectional pipelines, including outcomes data

Insights delivered to point of care

Actionable intelligence embedded in clinical and research workflows

Agentic Tools

Diagnostics connected to clinical trial and care gap real time insights

Precision medicine *powered by diagnostic intelligence*

Clinical Testing

Leveraging our broad portfolio of assays to ensure the right test reaches the right patient at the right time across the patient journey

EHR Integrations

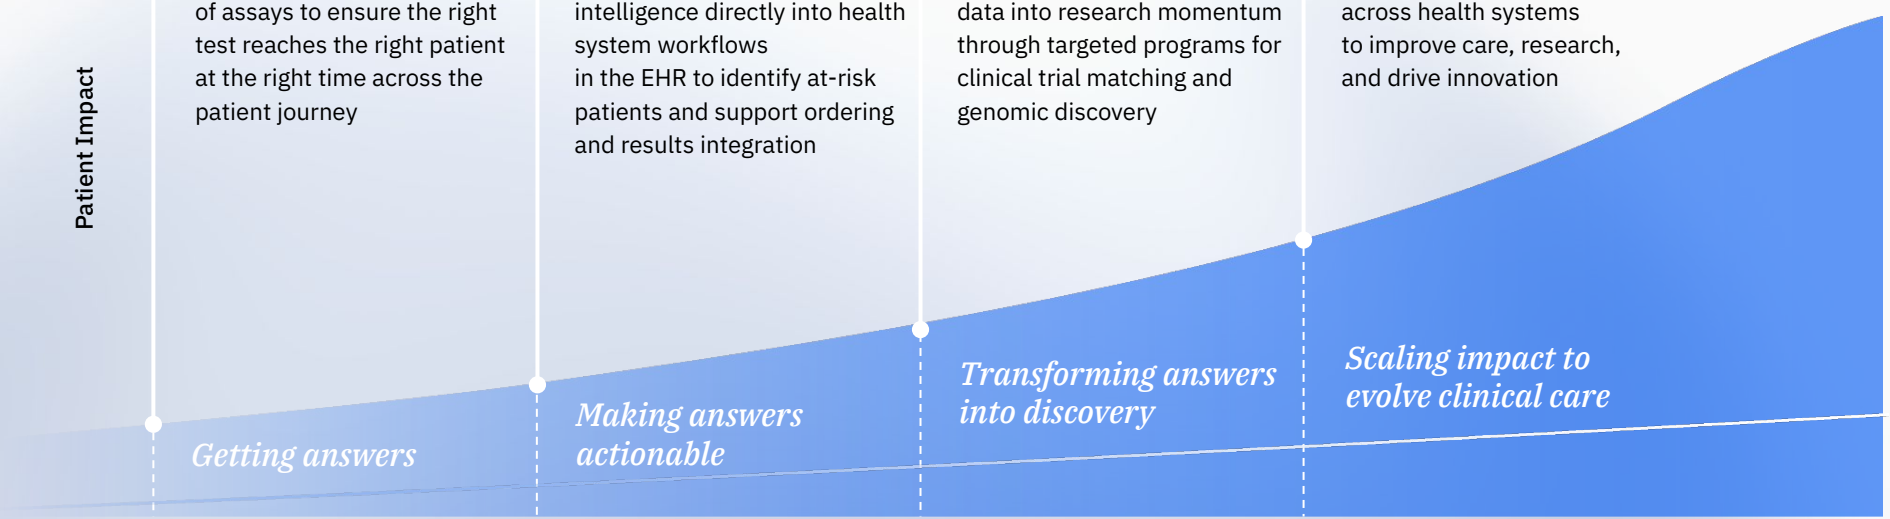

Embedding diagnostic intelligence directly into health system workflows in the EHR to identify at-risk patients and support ordering and results integration

Research

Converting multimodal patient data into research momentum through targeted programs for clinical trial matching and genomic discovery

AI & Technology

Deploying advanced technologies across health systems to improve care, research, and drive innovation

Graph is for illustrative purposes only.

Our Diagnostics business is *comprehensive and spans* hereditary risk, therapy selection, and MRD & monitoring, fueling our models with longitudinal data

Hereditary risk assessment

xG Germline testing

Therapy selection

xT, xF Tissue + Liquid Biopsy

xR DNA + RNA

Tumor + Normal Match

NeXT Dx

ImmunoID NeXT (biopharma)

Tailored testing*

HRD UGT1A1 DPYD

IPS TO PurIST™ MMR

CLDN18 PD-L1 1p/19q

HER2 FOLR1 MGMT c-MET

MRD & disease monitoring

xM Tumor-naive

xM NeXT Tumor-informed

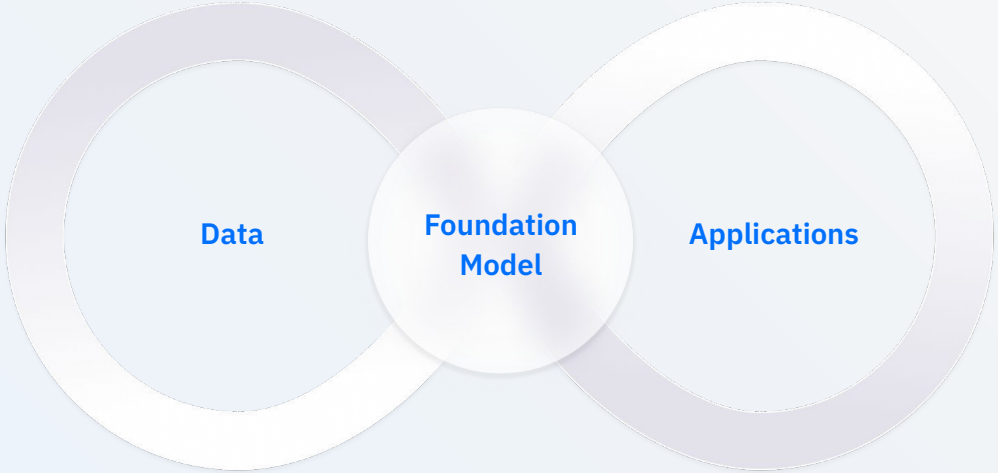

Acquired Personalis tests

Subject to closing of proposed acquisition

Data generated through Diagnostics creates a virtuous cycle of *AI-enabled intelligence*

As more clinicians use our AI Applications they contribute more data to our platform, creating a self-reinforcing cycle of intelligence.

This network effect has led to compounding growth in our multimodal dataset in oncology and other disease areas.

TEMPUS

Q2’26 Financial Results

Q2’26 Financial Highlights

$382.5M
Total revenue
22% Growth YoY

$8.0M
Adj. EBITDA
244% Improvement YoY

31%
Oncology Volume Growth

28%
Data & Applications Growth

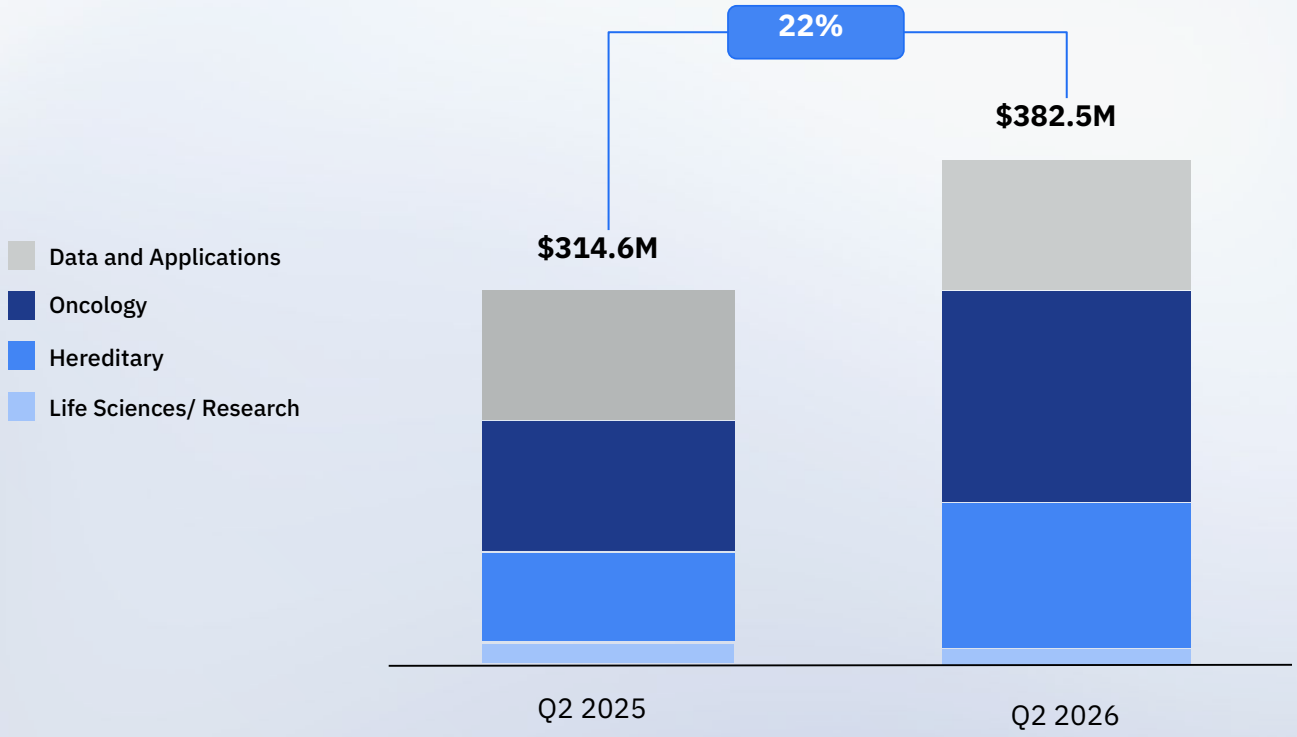

Gross profit increased 26% to $246.5 million led by growth in Data & Applications

Net income of $5.6 million compared to a net loss of ($42.8 million) in Q2’25

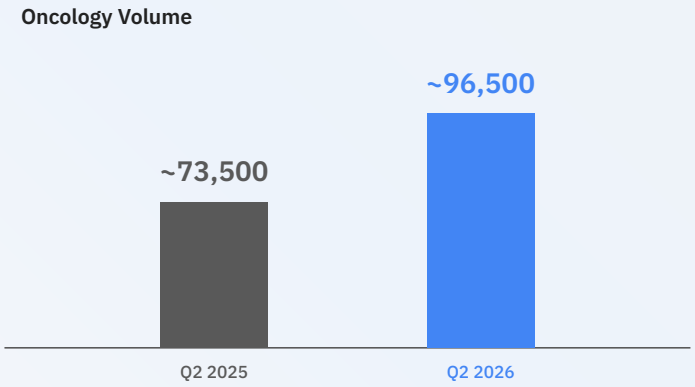

Ended Q2’26 with $820.7 million in **cash, cash equivalents, and marketable securities**

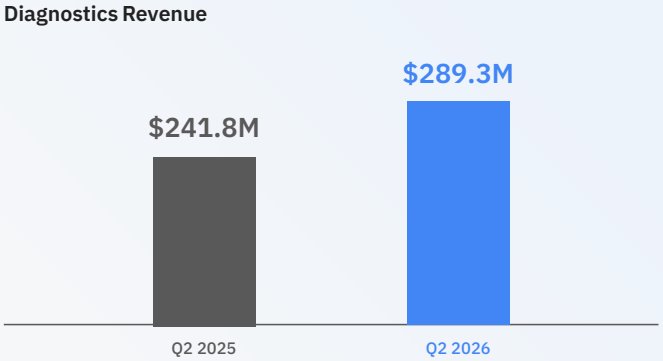

$460.0 million Offering of 0.0% Convertible Senior Notes saves $30 million+ in interest expense annually, **which is expected to allow us to be cash flow positive by year end 2026**

Q2 Revenue delivers 22% growth

Diagnostics drives growth with revenue and Oncology volume expansion

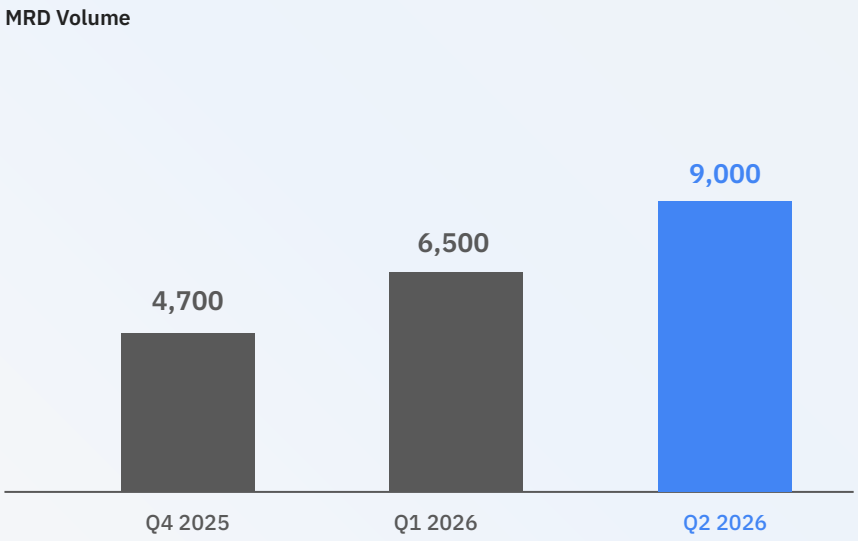

Oncology and Hereditary achievements fueling Diagnostics growth

Q2 Diagnostics Highlights

- 31% YoY Oncology volume growth, 20% YoY Diagnostics revenue growth
- Received FDA approval for tumor-only xT CDx, enabling migration of entire DNA solid tumor portfolio under ADLT pricing
- Clinical launch of **xH**, a NGS whole-genome approach for hematologic malignancies
- Clinical launch of Rare Whole Genome
- Introduced Tempus Preview surfacing key mutation predictions within ~24 hours of tissue receipt

MRD volumes accelerate and provide long-term growth opportunity

MRD Highlights

- 38% growth over Q1 2026 with only ~10% of salesforce selling today
- xM tumor naive represents ~5% of total MRD volume today, providing massive opportunity for upside
- Announced acquisition of Personalis (PSNL) and its tumor-informed xM NeXT to more tightly integrate MRD data into our AI-driven precision oncology platform, if consummated

Therapy Selection ASP expected to rise significantly over the next several years

Tailwinds from reimbursement to expected to drive ASP growth of >$750* over next several years

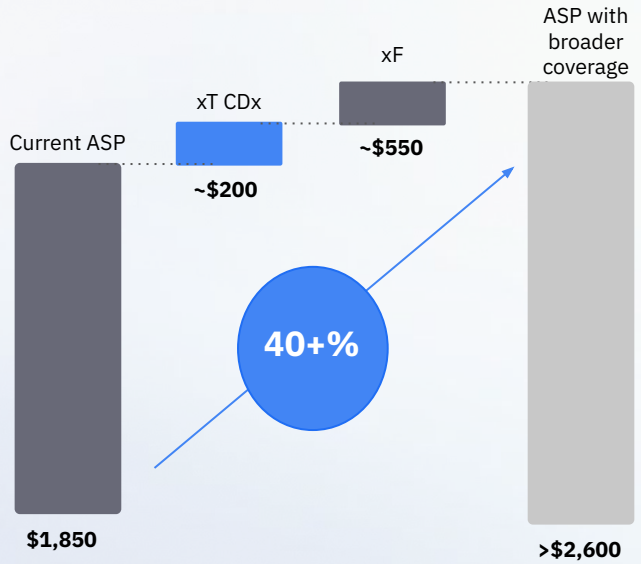

Reimbursement Milestones

FDA approval of tumor only xT CDx enables entire DNA solid tumor portfolio to be migrated from LDT (~$2,900) to xT CDx ($4,500) beginning in 2027

FDA clearance for xF could drive ASP increase of ~$550

Broader commercial coverage over time

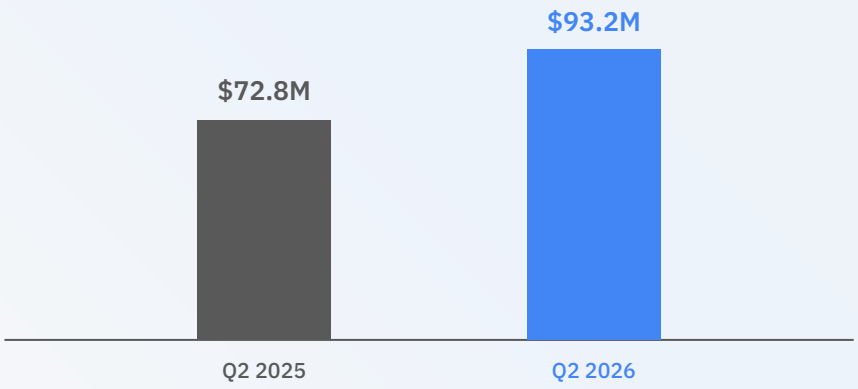

Illustrative path to >$2600 ASP*

Assuming Q2 2026 assay and payor mix

Data & Applications growth accelerates on strong partnership expansion

Data & Applications Revenue

Q2 Data & Apps Highlights

- 28% growth YoY, with Insights growing 36%
- Announced collaboration with Bristol Myers Squibb (NYSE: BMY) to leverage AI, multimodal real-world data and data science to optimize clinical trial designs
- Secured ~$200M in bookings
- Delivered oncology Foundation Model to AstraZeneca
- Established an open-source digital pathology consortium with premier institutions including Memorial Sloan Kettering and Yale

Performance summary

Q2 2026

Scaling Diagnostics and Data & Applications fueling operating leverage and Adjusted EBITDA expansion

	Q2 2026	Q2 2025	Change
Revenue	$382.5M	$314.6M	22%
Gross profit	$246.5M	$195.0M	26%
Loss from operations	$(75.9)M	$(61.8)M	23%
Non-GAAP loss from operations	$(2.7)M	$(17.0)M	(84)%
Net income (loss)	$5.6M	$(42.8)M	113%
Adjusted EBITDA	$8.0M	$(5.6)M	244%
Non-GAAP net loss	$(7.7)M	$(37.3)M	(79)%
Net income (loss) per share, basic	$0.03	$(0.25)	112%
Non-GAAP net loss per share, basic	$(0.04)	$(0.22)	(82)%

Refer to the Appendix for reconciliation of non-GAAP figures to the most directly comparable GAAP figure

2026 Guidance

	Q3	FULL YEAR
REVENUE	**$405 - $410 million of revenue** • Continued strong oncology growth • Hereditary growth rate improving in H2 • Data & Applications growth of ~28% vs Q3 2025	$1.595 - $1.605B ~25% growth year-over-year **assumes no impact from Personalis acquisition in 2026*
ADJUSTED EBITDA	**$15-20 million** • Continued quarter over quarter improvement in Adjusted EBITDA throughout 2026, similar to previous years	~$65M ~$72M improvement over 2025
OTHER	• Stock-based Compensation ($52M) • Interest Expense ($10M) • Depreciation and Amortization ($30M) • JV Losses ($5M)	• Stock-based Compensation ($200M) • Interest Expense ($60M) • Depreciation and Amortization ($120M) • JV Losses ($20M)

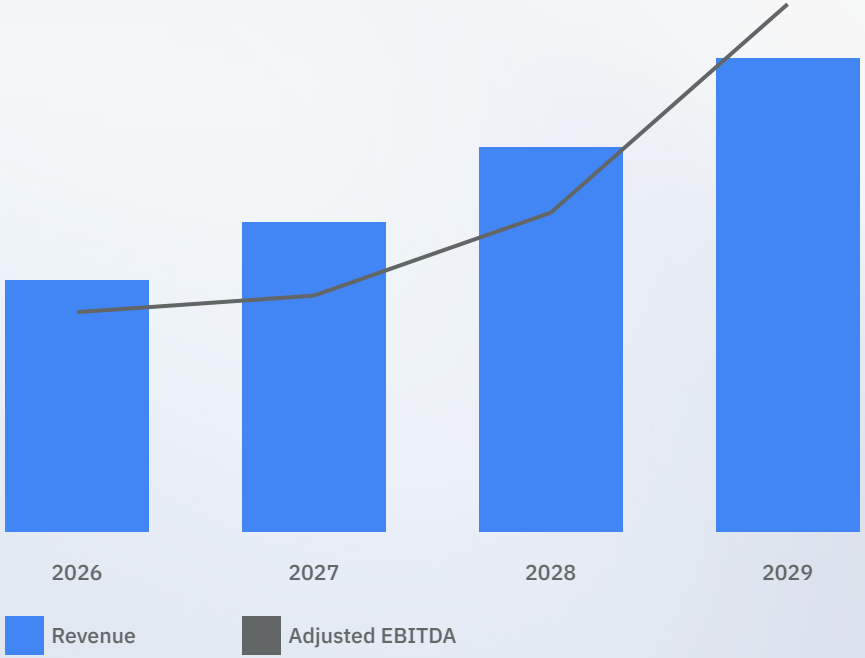

Our revenue and adjusted EBITDA guidance reflect targets and are therefore noted to be approximate values. Given the unique nature of our business, it is difficult to predict these numbers with complete accuracy; as such, the word "approximately" implies a modest range.

Balancing near-term reinvestment with long-term Adjusted EBITDA expansion

We **expect 25% top-line growth over the next 3 years** supported by continued strength in Diagnostics and expanding scale in our Data and Applications business.

Over the next several years, we plan to reinvest the majority of incremental gross profit growth to accelerate platform expansion, while **still generating meaningful Adjusted EBITDA and positive cash flow**.

As the platform matures, we expect increasing operating leverage to allow a greater portion of growth to flow to adjusted EBITDA.

Illustrative long-term framework; does not constitute formal financial guidance

Acquiring Personalis Will Further Integrate MRD into our AI-Enabled Precision Oncology Platform

Transaction & Rationale

Tempus is acquiring remaining shares for **$16.25/share** via stock and up to 50% cash.

- Will expand presence in the **$20B+** U.S. MRD market (<10% penetrated).
- Will create an end-to-end oncology portfolio spanning risk to monitoring.

$1.5B
Enterprise Value, net of existing ownership

Q4 '26/Early 2027
Target Close

NeXT Personal® Assay

An ultrasensitive, tumor-informed whole genome assay tracking up to 1,800 genetic variants.

- Detects cancer recurrence **5 to 15 months earlier** than standard imaging.
- Filters out confounding clonal hematopoiesis (CH) variants.

1.67
PPM Sensitivity

1,800
Variants Tracked

Synergy & Scale

Will unlock immediate upside by scaling across Tempus's vast commercial footprint.

- Plugs into network covering **>55%** of U.S. oncologists.
- Feeds longitudinal MRD insights into Tempus multimodal dataset.

Q2 QoQ Growth

Tempus Acquisition of Personalis

Transaction Overview

Transaction Consideration	• Tempus AI will acquire all of the outstanding shares of Personalis' common stock not already owned by Tempus AI at a price of $16.25 per share, representing a 6% premium to their closing price on July 17, 2026 and a 28% premium to unaffected 30-day VWAP [(1)] • Results in a total transaction value of $1.7Bn ($1.5Bn net of Tempus' existing ownership interest) • Consideration will be structured as a combination of TEM stock and up to 50% cash at TEM's discretion. TEM's stock will be priced at the closing of the traction, which is expected in the fourth quarter of 2026 at earliest, subject to shareholder and regulatory approval
Exchange Ratio	• Personalis shareholders will receive a floating exchange ratio of Tempus AI common stock for each share of Personalis common stock they own at closing, subject to a a maximum exchange ratio of 0.3356x
Financing	• Cash consideration can be financed with cash on hand and/or additional borrowing TEM procures between signing and closing
Approval Process	• Approved by both companies' boards of directors • Subject to approval from Personalis shareholders and customary closing conditions • The closing of the transaction is expected to take place in the fourth quarter of 2026 at earliest
